

My Peer Review for my Social Resource Page

Written feedback for your classmate to improve the work:

What did you think were the best features of this resource?

Your powerpoint was great! The inclusion of all those images in it made it easy to follow and understand your instructions and gave it good depth. You have created a unique idea with your event which i feel could benefit many and you have given one other example of how flickr could be used (ie. for traveler social networking.) i also liked the simple colours and layout of your site, it made it manageable and easy to read.

What features do you think could be improved and how?

If you add more images to you site, especially the social networking page it would be easier to connect with. You need to give more evidence of experimentation (with other sites and other aspects of the flickr site; what are some other possibilities) Maybe you could add some instructions for other things you can do with flickr (how to communicate wint others and make friends etc)
